Dear NAAFA,

I just finished reading the article from Insurance Journal just posted by NAAFA on the member-side of your website. (Ex-CFO of Bankrupt Enron offers D&O Lessons from Accounting's 'Gray' area)

<http://www.insurancejournal.com/news/national/2017/02/15/441619.htm>

Wow, What an enlightening interview! I fear AmFam leadership fits this mold to a T. They know corruption exists and are promoting it in similar ways, but I suspect they are similarly blind to the fact that the CEO can be held responsible. They believe Management can spend the company money to protect such management as was witnessed in the recent \$20M Missouri case. I also suspect AmFam uses the same software to discover who is panicking (why wouldn't they?)
