Almost all of AmFam computers, including those in the agents' offices, appear as though they are in Wisconsin or Minnesota. My PC in *(name of city redacted to protect writer's identity)* always shows that I am in WI. Even when I did a search on Google, I had to tell it where I *really* was instead of where it appeared.

Editor comment:

It appears it is all part of AmFam's plot to de-emphasize agents' image and emphasize the company's image. Have you read the McKinsey Report....done by the consultant AmFam has hired? See NAAFA.com Home Page.
